

Design/Build

From concept to completion, Power Solutions collaborates closely with the full project team – owner, architects, engineers and general contractors – to electronically model systems to visualize and ensure successful outcomes. Services include:

- 3D modeling of design intent
- Coordination with other trades through the BIM (Building Information Modeling) process
- Coordinated shop drawings from the ground up, including one-line riser diagrams, conduit, busduct and cabletray layouts
- Comprehensive and complete as-built drawings
