

## Electrical Construction

Power Solutions provides general electrical construction services for mission-critical and other environments, from healthcare to government institutions, commercial projects to industrial properties.

Mission-critical facilities present unique building challenges for electrical contractors, as operations simply cannot be disrupted – at any time. Able to deftly navigate these environments, Power Solutions' expertise and manpower also enable us to work within the often aggressive project schedules that these types of projects demand. We recognize the importance of these facilities to the people they serve.

Power Solutions' skilled electricians, experienced project managers and thorough estimating department are able to meet the unique challenges of all types of construction projects regardless of size or complexity. And our collaborative approach with general contractors and owners acknowledges the critical importance of communication, coordination and attention to detail to the success of every project.
