Craftsmanship Drives Lighting System Renovations

The renovated Yours Truly Hotel (formerly The Wink Hotel) near Washington DC's historic Georgetown neighborhood is a mix of bohemian chic detailing with a modern twist on finishes and luxury.

The renovated 25,000-square-foot lower level event space comprises three banquet rooms, four meeting rooms, pre-function seating areas, bathrooms, kitchen spaces, an outdoor event space and the elevator lobby.

The renovated 16,000-square-foot upper level includes Mercy Me Restaurant, El Donut Shoppe, a bar/lounge area, outdoor restaurant patio, grand staircase, meeting rooms, large ballroom, hotel kitchen, bathrooms, hotel registration area and hotel exterior façade.

Power Solutions performed an interior power infrastructure upgrade which included new branch power panels for lighting, receptacles, mechanical equipment and kitchen equipment. The project also involved the installation of more than 35 different types of light fixtures that work with a Lutron Controls System. The new lighting was designed to accentuate décor and create the mood of at-home comfort. It provides hotel staff with the flexibility to modify scenes within each space.

The existing fire alarm program was also updated and expanded in the renovated areas to further ensure guest and staff safety.

This boutique hotel is truly the essence of union craftsmanship and skill by the Power Solutions team.
