

Testing

Power Solutions' electrical testing group provides services from acceptance/preventive maintenance testing of electrical power distribution systems to power system studies, retrofitting, battery maintenance and testing, infrared studies, troubleshooting and 24/7 emergency services. All testing is conducted in accordance with NETA guidelines.

Services

Power System Studies

- Short Circuit
- Coordination
- Arc Flash
- Engineering Support

Acceptance/Preventive Maintenance of Both Low and Medium Voltage

- Switchgear
- Transformers
- Circuit Breakers
- Switches
- Protective Relays
- Cables
- Network Protectors
- Ground Systems
- Motors
- DC Systems
- Bus

Power Solutions covers the full range of DC battery systems. We will test and maintain your entire system as well as tending to specific gravity, cell temperature, contact resistance testing, and voltage monitoring.
